

City of Medical Lake's List of Backflow Assembly Testers (BAT)

The following list of Washington State Certified Backflow Assembly Testers is those that have allowed the City of Medical Lake to include them on our list. This is just a partial list of testers in the area who are qualified to test backflow devices. The order in which these testers appear on this list is alphabetic. **We suggest securing several estimates of cost of testing your backflow assembly(s) and do they also repair assemblies if they fail?**
